

Clay Township Phragmites Management Program Chemical Order Form 2018

If you need treatment chemicals to control your Phragmites they are available for purchase from Clay Township. To order you must already be registered participant in the Clay Township Phragmites Management Program of this current year (separate form) and you must take the required Phragmites Control Workshop. If you attended a workshop in previous year, you will not be required to repeat. You are not authorized to treat Phragmites until you receive your Approval to Treat from the Township. As a participant in the program, you should receive that approval around September 1st.

To order chemicals, you must pay in advance at the Clay Township Treasurer's Office. At the time of payment, you will receive a receipt which will need to bring with you when you pick up your chemicals. If you mail in your order form and payment, please include a self-addressed stamped envelope for the return of your receipt. Times for chemical pick up are not known at this time. You will receive a call in late August to provide you with pick-up details.

**If you have any questions about the pick-up arrangements, please call
Clay Township Phragmites Management Advisory Board at 810-519-2985.**

The two chemicals available through this program are as follows:

1. Herbicide – Glyphosate – 53.8% a.i. – available in 2.5 gallon containers for \$70.00
2. Surfactant – Cygnet Plus – available in 1 gallon containers for \$30.00

You will need both chemicals for the proper mix for Phragmites Treatment. With one container of each chemical, you should have enough to do one treatment on approximately 3.3 acres of Phragmites. If you are buying two 2.5 gallon containers of herbicide, one gallon of surfactant will be enough for both bottles of herbicide. Unused product can be stored, if not allowed to freeze, for up to five years. A group of neighbors may purchase and share the cost and the chemicals. However, State Law requires that any unused products be stored in their original containers.

JULY 1st DEADLINE!
